October 2, 2014

Dear Prof. Kudang B. Seminar,

We would like to invite you to participate the Workshop SEAIP 2014 (Southeast Asia International Joint-Research and Training Program, [Here](#)) will take place on 1 – 5 December 2014 at Tainan, Taiwan. The workshop will be hosted by National Center for High-performance Computing (NCHC). The workshop is well received in the ICT community in Southeast and East Asia regions and the 10th meeting in a row. The workshop will focus on issues of science and technology in Cloud Computing, Big Data and Internet of Things.

SEAIP also works closely with the renowned international community PRAGMA (Pacific Rim Application and Grid Middleware Assembly) for the past 10 years. It allows us to extend the collaboration in the region to the Pacific Rim in general, which benefit all participants from the region. We encourage participants to present their research to strength the connections around the Pacific Rim and develop collaborations through the exchange of research results and ideas.

If you are coming, SEAIP will cover your air tickets, accommodation, food and local transportation. We look forward to your participation and contribution. Should you have any question regarding SEAIP 2014, please contact our Executive Chair Fang-Pang Lin (fpplin@narlabs.org.tw) or secretariat Ms. Karen Chang at d00ycc00@nchc.narl.org.tw.

Sincerely,

Ce-Kuen Shieh

Chair, Southeast Asia International Joint-Research and Training Program
Director General, National Center for High-performance Computing

Li-Der Chou

Co-Chair, Southeast Asia International Joint-Research and Training Program
Deputy Director General, National Center for High-performance Computing
